(54) Title: METHOD AND APPARATUS FOR DATA LOGGING

(57) Abstract: There is described a data logging method for transferring data from a plurality of client devices (100A-N) to a server (300), said method comprising: building a schedule of transfer periods based on an estimated transfer size for each device; receiving an actual transfer size for a device; updating the schedule for all devices with respect to the difference in the received actual transfer size and the corresponding estimated transfer size for said device; and transferring data for said device.
